48 receipts for one Claude Ultra plan

A Dutch business reviewed its own Anthropic receipts for a development project. Paid dates run from 7 to 24 November 2026. The largest part of the outlay was prepaid credit.

AMOUNT PAID IN EUR

€3,416.41

ADDITIONAL CREDIT PURCHASES

€3,236.41

94.73% of the total

What the receipts record

Claude Ultra subscription	1 receipt	**€180.00**
Prepaid extra usage	39 receipts	**€3,145.00**
Automatic extra-usage recharge	8 receipts	**€91.41**

The 39 prepaid purchases comprised 20 at €76.50 and 19 at €85.00. The euro total is 18.98 times the subscription payment. The receipts show credit purchases. Measuring consumption requires a usage ledger. A separately reported US$40 is outside this euro series.

How close were the notifications?

Fourteen of 47 consecutive receipt-email intervals were under one hour. The shortest was 9 min 1 sec between automatic recharges. Among the 39 prepaid notices, 7 of 38 intervals were under one hour. Two €85 notices on 22 November were 37 min 59 sec apart. The times are email headers. The receipts provide a payment date only.

What remains to be established

Anthropic describes a monthly spending cap, optional unlimited spending, alerts and optional automatic recharge. On 6 November the provider emailed this account about credit expiry and linked to the auto-reload controls. Account settings, which alerts appeared, clicks, prior consent and the effect of interface design require separate evidence.
